Select the required operating mode

Auto - Automatic mode, the thermostat executes the pre-programmed schedules. To adjust these schedules, see **page 2** the program section.

In addition to Automatic mode, this thermostat has 3 manual modes:   , each of these manual modes maintains a constant set temperature set by the user.

-  - Comfort temperature mode, the highest temperature you want to achieve, this is the temperature that will be required when the room is in use. Default is 22°C.
 -  - Economy temperature mode, the lowest temperature, the temperature you want to go no lower than when the room is not in use. Default is 16°C.
 -  - Vacation temperature mode, this is set to stop your floor from going below the set temperature. Default is 10°C. To change the set temperatures, touch temperature display.
- Use  or  to adjust to the required temperature. Touch  to store and exit.

Setting the clock and day the week

This thermostat is fitted with a real time clock. It is essential that the clock time and day are set accurately if you require your programmed events to start on time. Follow the steps below,

1. Touch time display . Use  or  to change the time.
Press and hold  or  to change the time faster.
Touch  to store and exit (or touch time display to cancel and exit).
2. Touch day display. Use  or  to change the day.
Touch  to store and exit (or touch day display to cancel and exit).

Save money by setting program schedules

This thermostat can be individual 7-day programmable. For each day of the week you are able to have 4 timed set temperature schedules.

Program	Start Time	Setpoint	Explanation
01	WAKE 07:00	22°C	Set to the time you would like to wake to and the temperature you want during the morning, until you left for the day.
02	LEAVE 09:30	16°C	Set to the time you leave home and the temperature you wish your home to maintain while you are away at work perhaps.
03	RETURN 16:30	22°C	Set to the time you return home at end of the day and the temperature you want during evening until bed time.
04	SLEEP 22:30	16°C	Set to the time you sleep and the temperature you want overnight(usually a comfortable and energy saving temperature).

Above are default program schedules, to make changes, follow the easy steps below

In 7 day program mode

1. Press , you will see day display flashing.
2. Use or adjust the day to the day you wish to start programming or to the day you wish to edit an existing event or program. (Press to select all days of the week, to cancel selecting all days of the week, press again.)
3. Press the LCD will show program 1 with the time display flashing.
4. Use or adjust the time you wish the program 1 event to commence for the currently selected day or days.
5. Press the LCD will show a temperature value flashing
6. Use or the desired heating temperature to be maintained for the program 1 event.
7. Press now the LCD will show program 2 with the time display flashing, signifying the second daily event is now being programmed.
8. Repeat step 4,5,6 to set remaining programs. Press to store and exit.

Note: It is faster to program the same schedule for the entire week and then to adjust the exceptional days.

In 5+2 day program mode

1. Press , you will see the time flashing.
2. Use or to set your weekday Wake time(Mon-Fri), then press
3. Use or to set the temperature for this time period, then press
4. Set time and temperature for the next time period(Leave). Repeat steps 2 and 3 for each time period of the weekday.
5. Press to move to the weekend(sat-sun) time periods settings.
6. Press to save and exit.

**Note: Day 1 - 5, refers to the weekday(Monday to Friday)
Day 6 - 7, refers to the weekend(Saturday and Sunday)**

During setting programs, press (if visible) will clear a program entry and thermostat will maintain the temperature setpoint of the last executed program until the beginning of the next program.

Reset to Factory Settings

With thermostat turned off, press and hold the up left corner of display for 5 seconds until you can see "RES" (RESET) on LCD.

Lock the Keypad

To lock the keypad, press and hold the bottom left corner of display for 5 seconds, you will see a lock symbol . To unlock, repeat the steps above.

Temporary Temperature Override

Touch the temperature display, and it will start to flash. Use or to adjust. Press to accept, and you will see "O/RIDE" on LCD.

Thermostat will maintain the new set temperature until the next programmed event(comfort level). To cancel the override setting, press

Installation and Wiring Instructions

STEP 1

1

Carefully separate the front half of the thermostat from the back plate by placing a small flat head terminal driver into the slots on the bottom face of the thermostat

STEP 1

2
